1 Manuals and/or Practical Demonstrations

1.1 Processing PDFs

Figure 1 shows how data has been extracted from three uploaded files.

Figure 1: Demonstration of PDF Processing

1.2 Querying Searches in Clinical Databases

The column Patogenicidad.Buscada in the table of Figure 2 corresponds to the searches for mutations in the ClinVar database.

Figure 2: Demonstration of querying clinical databases

1.3 Modifying Tables

Double-clicking on any cell in the tables will open an editor where we can modify the value of that cell.

Figure 3: Demonstration of table modification

1.3.1 Sorting Values

In this example 4, the column Porcentaje_tumoral has been sorted in descending order.

Figure 4: Demonstration of sorting values

1.3.2 Filtering Rows

In Figure 5, only records corresponding to male patients have been filtered.

Figure 5: Demonstration of filtering rows

1.4 Exporting Data

In this example, the data has been extracted into a CSV document 6, and the visualization of the downloaded file is shown in 7.

Figure 6: Demonstration of exporting data

Figure 7: Demonstration of exporting data

1.5 Creating Patient History

In Figure 8, the records of the analyzed documents are shown in the MongoDB Compass application.
